Sector Specific Certifications

Aerospace

The orientation towards quality and standards cannot be more imperative when it comes to the sector of Aerospace. The certification process helps the industry streamline the entire business structure and it helps in setting sustainable standard operating procedures.

AS 9100 : For Aerospace Organizations and its suppliers.

AS 9110 : For Aerospace Maintenance Organizations.

AS 9120 : For Distributors of Aerospace Commodity items.

DO 178B: The document for guidance to determine if the software will perform safely and reliably, in an airborne environment.

Automotive

ISO/TS 16949

The ISO/TS16949 is an international standard for Automotive Industries, aiming to the development of a quality management system that provides for continual improvement, emphasizing defect prevention and the reduction of variation and waste in the supply chain.

Chemicals & Fertilizers

RC 14001

The RC 14001 Responsible Care Management System (RCMS) was developed by the ACC to integrate the Responsible care guiding principles and codes of management practice and to transform them into a continual improvement based plan-do-check-act management system approach.

Clinical Research, Food & Pharmaceutical

WHO - GMP

The World Health Organization (WHO) version of GMP (Good Manufacturing Practices) is used by pharmaceutical regulators and the pharmaceutical industry in over one hundred countries worldwide, primarily in the developing world.

ISO 22000

ISO 22000 is the risk management system for any type of food processing and marketing, which can be closely incorporated with the quality management system of ISO 9001.

HACCP

Hazard Analysis Critical Control Point (HACCP) is a systematic preventive approach to food safety and pharmaceutical safety that addresses physical, chemical, and biological hazards as a means of prevention rather than finished product inspection.

Educational Institutions

ISO 29990

With ISO 29990, learning service providers have in their hands the first internationally applicable standard that focuses on the single most important asset organizations and facilities in this sector have: the learning services themselves. The standard can be certified against, making it eminently suitable for providing evidence of the quality and competence of learning service providers to all relevant stakeholders – above all, the learners themselves.

IT & ITES

ISO 20000

ITIL® provides guidance on what should be done in order to offer the clients of an IT organization adequate IT Services to support their business needs.

ISO 27001

ISO/IEC 27001 formally specifies a management system that is intended to bring information security under explicit management control.

eSCM

The eSourcing Capability Model (eSCM) is a framework developed by ITSqc at Carnegie Mellon University in order to improve the services of IT service providers to their clients and end users.

Medical Devices

ISO 13485

ISO 13485 is the most accepted management system standard worldwide for manufacturers of medical devices.

Railways

IRIS

International Railway Industry Standard is the quality management standard for the railway industry. Developed by UNIFE, the Independent Association of European Railway Industries, and supported by system integrators, equipment manufacturers and operators, IRIS is an internationally recognized standard for the evaluation of railway industry management systems.

Telecom

TL 9000

TL 9000 is a common set of quality management system requirements and measurements designed specifically for the telecom industry, encompassing ISO 9001 and telecom industry best practices.

We cover many more sectors such as BFSI | Hospitality | Healthcare...

Non Sector Specific Certifications

ISO 9001

ISO 9001 is a standard for quality management systems.

ISO 14001

ISO 14001 to achieve continual improvement of its environmental performance.

OHSAS 18001

OHSAS 18001 is an Occupational Health and Safety Assessment Standard for health and safety management of any organization.

ISO 27001

ISO/IEC 27001 formally specifies a management system that is intended to bring information security under explicit management control.

ISO 50001

ISO 50001 is a management system standard that supports your organization in the implementation of a comprehensive energy management system.

ISO 22301

Business Continuity Management is a management process that identifies risk, threats and vulnerabilities that could impact an entity's continued operations and provides a framework for building organizational resilience and the capability for an effective response.

ANSI/ESD S 20.20

This Standard is applicable to various sectors like commercial electronic, telecommunication, aerospace, automotive and medical device industries as the best method to help preventing costly field failures and in-house re-work of electronic components due to ESD (Electro Static Discharge).

Special process assessments and certifications

Certification services for the purpose of adding value, reducing total cost, and facilitating relationships between primes and suppliers.

SA 8000

The SA8000 is an international standard to formally manage organizations Social responsibility process.

SMETA conformity – SEDEX SMETA-Audit

The Supplier Ethical Data Exchange Database is a worldwide platform for the exchange of information on ethically sustainable production in the supply chain.

Knowledge Solution Centre (KSC)

Knowledge Solution Center is the accrued result of all our experiences and expertise in the field of quality processes. As an organization we believe it is our duty to impart onto our eligible clients what we know in terms of our knowledge of all that is to do with business processes and quality. A quaint characteristic of what we reckon transforms our clients to more than just a follower of this process, but to a more sophisticated level such as understanding and evolving by using corrective measures to ensure the delivery and sustainability of these processes.

Water Audit for Industries

A Water Audit is a systematic approach of identifying, measuring, monitoring and optimizing the Water Consumption for various activities in industry and providing gaps and suggestions to improvement plan to conserve water. DQS India has experts who have decades of experience in Water Domain, & they come with a sound knowledge on Water Quality, Water Balancing & Water Conservation Techniques.

Sustainability

Sustainability is the capacity to endure. Healthy ecosystems and environments are necessary to the survival and flourishing of humans and other organisms. Sustainability requires the reconciliation of environmental, social equity and economic demands – also referred to as the “three pillars” of sustainability.

DQS India offers Sustainability Solutions such as - ISO 14001, RC 14001, ISO 50001, SA 8000, SEDEX (SMETA) and GRI Reporting & Assurance.

GRI Reporting: The Global Reporting Initiative (GRI) Sustainability Reporting Framework enables companies and organizations to measure and report their sustainability performance.

NVG: Indian Government Ministry of Corporate Affairs has released a “National Voluntary Guidelines on Social, Environmental and Economic Responsibility of Business (NVG)”. The Non Voluntary Guidelines will improve the ability of business to enhance their competitive strengths, improve their reputations & increase their ability to attract and retain talent and manage relations at large.

Tfs Initiative: Together for Sustainability initiative was founded by six multinational chemical companies: BASF, Bayer, Evonik Industries, Henkel, LANXESS and Solvay; aiming at developing & implementing a global supplier engagement program that assesses & improves sustainability sourcing practices, including ecological & social aspects.

Energy Audits

We at DQS India believe and know, that there is a lot more to saving energy in any organization than just pseudo superficial efforts. With our expertise on setting standards of processes, saving energy in an organization is no different from setting a process. Talk to our representatives to learn more about this function. Surely this is an edge to your overhead cost cutting process.

Safety Excellence

Promoting Safe Behaviour at work is critical to manage health and safety as behaviour turns systems and procedures into reality. On their own, good systems do not ensure successful health and safety management, as the level of success is determined by how organizations ‘live’ their systems.

- Behaviour Based Systems (BBS)
- Process Safety Management (PSM)
- Process Hazard Analysis (PHA)
- Disaster Management (DM)

Ergonomics Assessments & Trainings

With Medical doctors on our panel, DQS India offers Evaluations and Training Programs to obtain the skills and knowledge needed to recognize, evaluate, and control ergonomic risk factors in the workplace. With the imbibed knowledge, you can improve work setting, increase productivity, reduce employee downtime from ergonomic injuries, and improve worker safety while preventing injury, thereby boosting the morale of the employee and in turn a cost-benefit to the employer.

Supplier (Vendor) Evaluations

The Vendor Assessment is customized to suit the requirements of each OEM/Organizations. The assessments generally cover supplier system on quality leadership, supplier base management, manufacturing process control, corrective and preventive quality, six sigma techniques and lean manufacturing.

Training

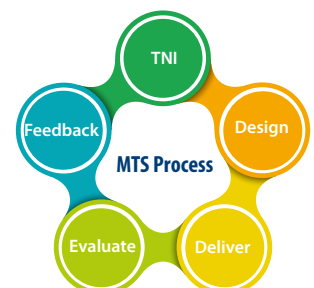

DQS India offers a broad portfolio of client training services under KSC. KSC provides trainings both through public programs and in-house private programs on various topics through faculty with experience. The goals of training for quality performance are to create positive and measurable changes in the workplace – change that translates quickly into the ability of people to solve problems they occur and drive continuous improvement. Courses cover a full range of content that can benefit a variety of employees.

- Public Training Programs
- In-House Training Programs

Visit our website for detailed list & calendar of trainings.

Managed Training Solutions

Learning and Development is critical to any Organization to compete and sustain in the longer term. Companies need to continually invest in the skill development of the employees. With such an emphasis on learning & development, you need to have a trustworthy partner which can provide an effective and expert team for the job. DQS India has the required team to deliver an effective learning & development requirement at your organization.

Trust is the most valuable currency in the world. If your customers have trust in your organization and its products or services, you will have achieved a degree of success that cannot be measured in money alone. Customer loyalty and customer recommendations will follow in its wake, making that success permanent and accumulative. The GC Mark programs are designed to achieve this trust and maintain it, indefinitely.

GC Mark Services.

- ▶ Safety
- ▶ Sustainability
- ▶ Quality
- ▶ Hygiene

and many more labels...

Organizational Health Assessments

The success of the CEO lies in the success of his/her organization and its stakeholders.

The main challenge here is to provide the CEO with the pulse of the organization (a dashboard representing the critical performance metrics of the organization) and feelers for him to grasp and manage the operations, else he is at sea with all kinds of data flooding his desk.

GC Mark for Organizational Health would provide a holistic view of the performance of the organization covering the balanced four core capability areas:

- Financial Excellence
- Customer Life Cycle Excellence
- Operational Excellence &
- Employee Excellence

The core capability areas are then to be interwoven with four support capability areas, as given below, to establish right enablers to yield expected business outcomes:

- Implementation Management
- Innovation Management
- Compliance & Risk Management and
- Performance Management
